PNV-DHA Label

Rx Only Dietary Supplement

DESCRIPTION: PNV-DHA is a prescription prenatal/postnatal multivitamin/mineral/essential fatty acid softgel. Each softgel is cobalt blue in color, opaque, and imprinted with "BP321" on one side and blank on the other. PNV-DHA can also be beneficial in improving the nutritional status of women prior to conception.

PNV-DHA contains fish oil and soy.
OTHER INGREDIENTS: soy lecithin, palm shortening, and white beeswax. Coating contains: bovine gelatin, carmine powder, FD&C Blue No. 1, glycerin, purified water and titanium dioxide. Contains Soy.

PNV-DHA is a multivitamin/multimineral fatty acid dietary supplement for use in improving the nutritional status of women throughout pregnancy and in the postnatal period for both lactating and nonlactating mothers.

CONTRAINDICATIONS: PNV-DHA is contraindicated in patients with a known hypersensitivity to any of the ingredients.

WARNINGS: Ingestion of more than 3 grams of omega-3 fatty acids (such as DHA) per day has been shown to have potential antithrombotic effects, including an increased bleeding time and International Normalized Ration (INR). Administration of omega-3 fatty acids should be avoided in patients taking anticoagulants and in those known to have an inherited or acquired predisposition to bleeding.

PNV-DHA Label

WARNING: Accidental overdose of iron-containing products is a leading cause of fatal poisoning in children under 6. Keep this product out of reach of children. In case of accidental overdose, call a doctor or poison control center immediately.

PRECAUTIONS: Folic acid alone is improper therapy in the treatment of pernicious anemia and other megaloblastic anemias where Vitamin B12 is deficient. Folic acid in doses above 1.0 mg daily may obscure pernicious anemia in that hematologic remission can occur while neurological manifestations progress.

DIRECTIONS: Adults only. Take one capsule daily, as a dietary supplement, or as directed by a physician.

DRUG INTERACTIONS: PNV-DHA is not recommended for and should not be given to patients receiving levodopa because the action of levodopa is antagonized by pyridoxine. There is a possibility of increased bleeding due to pyridoxine interaction with anticoagulants (e.g., Aspirin, Heparin, Clopidogrel).

ADVERSE REACTIONS: Allergic sensitization has been reported following both oral and parenteral administration of folic acid.

DOSAGE AND ADMINISTRATION: Before, during and/or after pregnancy, one softgel daily or as directed by a physician.

HOW SUPPLIED: Bottles of 30 softgels (42192-321-30). The listed product number is not a National Drug Code. Instead, Acella Pharmaceuticals has assigned a product code formatted according to standard industry practice to meet the formatting requirements of pharmacy and healthcare insurance computer systems.

STORAGE: Store at 20° - 25°C (68° - 77°F); excursions permitted to 15° - 30°C (59° - 86°F) [See USP Controlled Room Temperature.]

All prescription substitutions and/or recommendations using this product shall be made subject to state and federal statutes as applicable. **Note: This is not an Orange Book product. No representation is made as to generic status or bioequivalency.**

THESE STATEMENTS HAVE NOT BEEN EVALUATED BY THE FOOD AND DRUG ADMINISTRATION. THIS PRODUCT IS NOT INTENDED TO DIAGNOSE, TREAT, CURE, OR PREVENT ANY DISEASE.

KEEP THIS AND ALL MEDICATIONS OUT OF THE REACH OF CHILDREN.
